User Guide for the Swap Shop Inventory Tool (SSIT):

Overview: The SSIT has been designed as a tool to make logging all transactions, swaps, and donations within the Swap Shop easier, more accurate, and more efficient. It is meant to be used by members of the Golf Company Swap Shop Division. There are two files required in order to use the tool, an Excel and Access file.

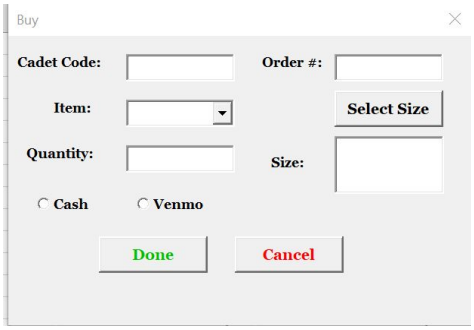

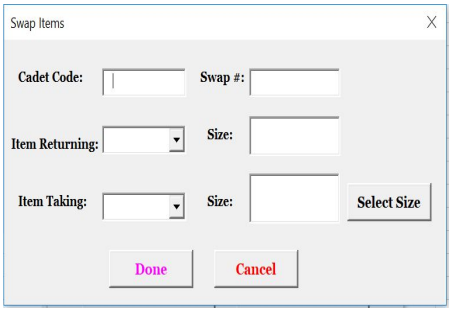

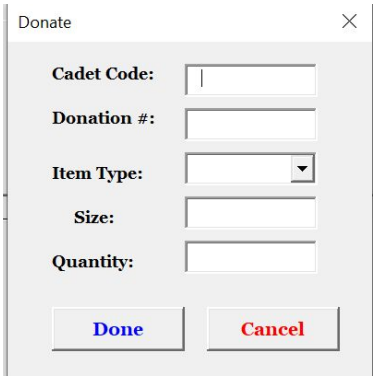

***Important note before running the program:** Be sure that the Access Database file is saved as "IISFinalProject.accdb"*

To Begin:

- Open Excel File "IS Final Project BRAMAN DOTY" and begin program by clicking the button named "Welcome to the Swap Shop!"
- A user form will appear, prompting you to select "Buy," "Swap," "Donate," or "Cancel."

Using the SSIT in EXCEL:

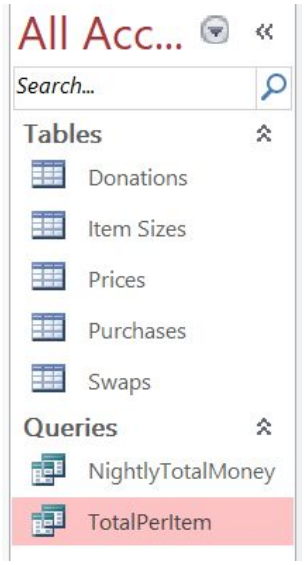

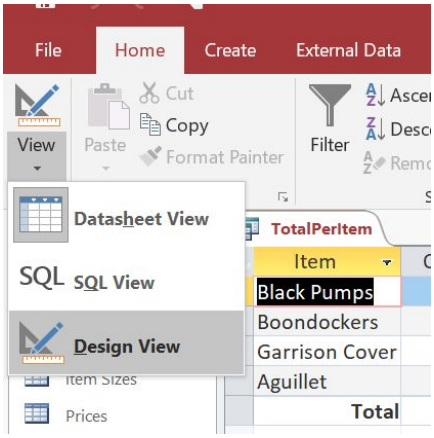

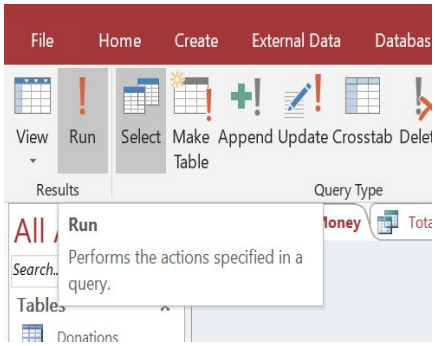

BUY BUTTON	SWAP BUTTON	DONATE BUTTON
		
• Enter Cadet Code • Enter Order # (number should begin at 1 and increase each time the same Cadet Code is inputted) • Select Item from dropdown list • Enter Quantity • Click "Select Size" button. The Size box will populate with sizes to choose from. Select a size.	• Enter Cadet Code • Enter Swap # (number should begin at 1 and increase each time the same Cadet Code is inputted) • Select Item Returning from dropdown list • Enter Size of Item Returning • Select Item Taking from dropdown list	• Enter Cadet Code • Enter Donation # (number should begin at 1 and increase each time the same Cadet Code is inputted) • Select Item Type from dropdown list • Enter Size • Enter Quantity

• Check either Cash or Venmo to indicate payment type.	• Click "Select Size" button. The Size box will populate with sizes to choose from. Select size of item taking.	

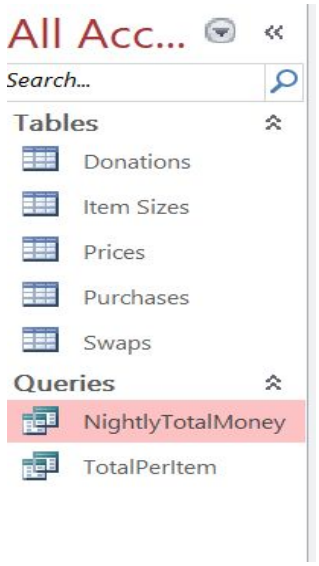

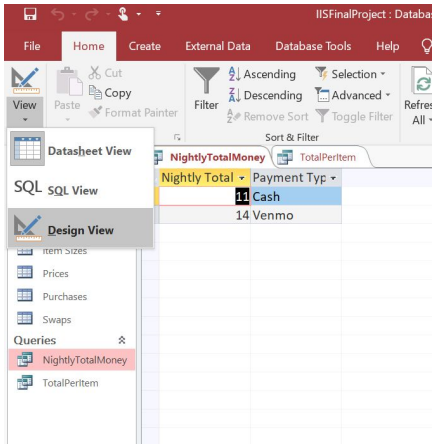

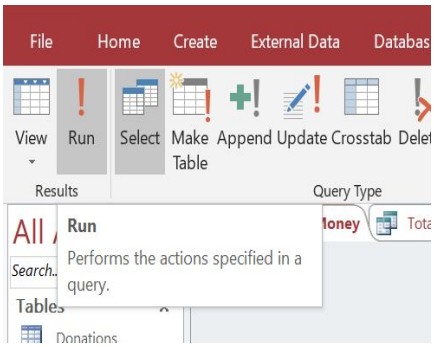

Using the SSIT in Access:

After filling out a form in the Excel file, the data should be stored in either the Donations, Purchases, or Swaps table in Access. This is found on the left side of the screen.

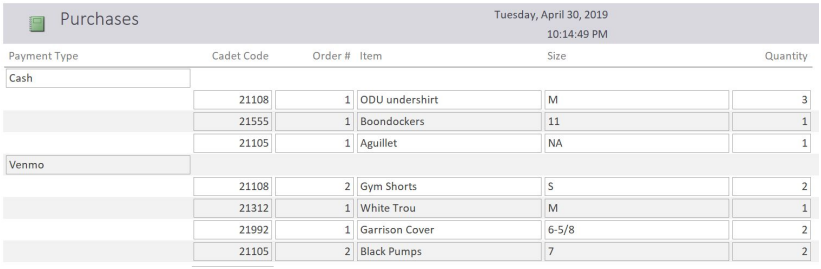

- **<u>Total Earnings Per Item</u>:**
  The final output should show how much money was earned from selling each item.

1. Select "TotalPerItem" on the left side of the screen.	2. Select "Design View in the upper left corner of the screen.	3. Select "Run" in the upper left corner of the tool bar.
		

- **<u>Total Money Earned</u>**:
  The final output will determine how much money as cash and Venmo was earned.

1.Select "NightlyTotalMoney" on the left side of the screen.	2. Select "Design View in the upper left corner of the screen.	3. Select "Run" in the upper left corner of the tool bar.
		

- **Additional Feature:**
  User can create an <u>Access Report</u> for any of the tables or queries. (This may be particularly useful if Cadet Activities or Golf Company Officer/Company Chief request a document with all of the transactions listed.)
  - Select a Table/Query
  - Click "Create" at the top of the page
  - Select "Report"

Purchases — Tuesday, April 30, 2019 10:14:49 PM

Payment Type	Cadet Code	Order #	Item	Size	Quantity
Cash					
	21108	1	ODU undershirt	M	3
	21555	1	Boondockers	11	1
	21105	1	Aguillet	NA	1
Venmo					
	21108	2	Gym Shorts	S	2
	21312	1	White Trou	M	1
	21992	1	Garrison Cover	6-5/8	2
	21105	2	Black Pumps	7	2

Assumptions/Limitations:

- Users must have limited knowledge of Access; however, this user guide with pictures should be sufficient for explanatory purposes.
- User must re-open Access after entering data in order to see it recorded in database.
- The size ranges are not specific to individual item sizing; rather they follow the "small, medium, large" format.
- Additional queries can be created and run upon the request of someone using the SSIT. We decided that the two outlined above were the most important/relevant, but the program is not limited to just these two.
